The CFPB helps consumer finance markets work by making rules more effective, by consistently and fairly enforcing those rules, and by *empowering consumers to take more control over their economic lives.*

## **Educate**

We encourage financial education and capability from childhood through retirement, publish research, and educate financial companies about their responsibilities.

## **Enforce**

We take action against predatory companies and practices that violate the law and have already returned billions of dollars to harmed consumers.

## **Study**

We gather and analyze available information to better understand consumers, financial services providers, and consumer financial markets.
